

"EarWay® Pro allows me to work to my full scope of practice"

Alicia D.D. Spoor, Au.D.
Doctor of Audiology
Owner, Designer Audiology

After being introduced to EarWay®Pro, it is now part of my routine cerumen toolkit along with cures, irrigation, and suction.

The learning curve with the EarWay®Pro tool was relatively quick - around 20 patients or 30 ears, and the biggest hurdle was informing the patient that they would feel the device turning in the ear canal. However, patients appreciate the ability to feel the flexible, corkscrew tool prior to beginning the cerumenectomy and the clean-up is so easy, since it's a one-time use instrument. Additionally, everyone loves seeing the cerumen successfully removed from the ears.

As an audiologist and private practice owner, EarWay®Pro allows me to work to my full scope of practice, provides another tool to successfully treat patients in the office, and brings in more patients and additional revenue.
