## My experience with the EarWay Pro

I had a client who attended with complete occlusion.

I have attempted to use the EarWay Pro tool 5 times, this is my first removal of a complete plug, **practicing has definitely made me more comfortable with the tool.**

Removal took less than **10 seconds** and **canal was completely clear.**

The client reported no pain, only slight pressure, **client was very relieved and happy with overall experience.**

**I just had one of my most successful wax removals so far- look at the size of it!!!**

**I was so excited when this came out of the client's ear. Just thought I'd share.**

**I think the tool is great.**
